Mike,

The modifications seem to be reasonable.

We might want to confirm that CFAC did not use hex Chrome for water treatment in any non-contact cooling towers. This was common practice in some industrial facilities in the 60s and 70s.

Thank you.

Dick Sloan

Mr. Cirian,

Roux prepared two Record of Modification forms for additional sampling we would like to perform during the Phase II Site Characterization. Roux will give you a call to discuss these modification forms and the sampling rationale.

Please let us know if you need any additional information or have any questions. If you agree with the attached, please provide your concurrence on the modification request.

Thank you,
Laura
